# Why we're doing it

*The reason behind each step, in the same order.*

## Do now

---

- 1. Open Shopify and send the info**  
Nothing can be built until the account exists.
- 2. Lock prices and the pouch threshold**  
The store and any ads need final prices.
- 3. Decide the material**  
Needed for the product listings and the sustainability story.
- 4. Coming-soon page**  
Start collecting emails now, the band ships early July.
- 5. Ambassador shortlist**  
Our main way to reach people, and delivery day is when to start.

## Do next

---

- 6. Align the accounts**  
A business profile unlocks product tags, and consistency looks like a real brand.
- 7. Content rhythm**  
The slow build starts now, and filming in batches avoids quiet weeks.
- 8. Wholesale kit and gyms**  
The fastest, warmest revenue while the audience builds.
- 9. Customer comms**  
A test inquiry went unanswered for 7 days, so we cannot rely on manual replies.
- 10. Batch 2 timing**  
The restock takes 35 days, so we plan it before selling out.

## Then

---

- 11. Tracking**  
So any ad spend is measurable.
- 12. Small early paid**  
Organic from about 900 followers is too slow on its own.
- 13. Podcasts**  
Borrowed audiences and credibility.
- 14. Trademark**  
Protect the brand before committing anything to print.
